

Only full-TS0 three-repeat results are plotted; cross-batch pair agreement >=99% and |delta F1| <=1e-3. Median and repeat range shown.
EternaFold is CPU-only and appears only in panel a. eFold is official 0.1.3; the old 0.1.2 board uses a different protocol and is checked separately.
BPfold/UFold/E2Efold remain blocked by official weights; no unrestricted speed SOTA claim. Legacy head-only values are excluded.
